MANAGEMENT DISCUSSION AND ANALYSIS REPORT FOR THE FINANCIAL YEAR 2013-2014

The Board takes pleasure in presenting your Company's Twenty-third Annual Report for the year 2013-14 along with the compliance report on Corporate Governance. This chapter on Management Discussion and Analysis forms a part of the compliance report on Corporate Governance.

Industry Overview

The year 2013-14 marked a subtle turnaround in the fortunes of the global economy. Europe witnesses greater financial stability and there were signs of revival in a number of its constituent nations, led by Germany and U.K. The U.S. too saw better employment numbers and an improvement in its growth prospects which prompted its leaders to consider withdrawing the easy money policies that bolstered the economy. Emerging markets, however, experienced some deceleration in their growth.

On the domestic front, the economy seems to have finally bottomed out. After dipping to 4.5% during the previous year, GDP growth recovered to grow at 4.9%, largely due to revival in agriculture growth. However, the volatile rupee, stubborn inflation and stagnant industrial production continued to be a drag on the economy. Looking ahead, there are indications of a turnaround on account of better global growth, an improvement in export competitiveness and the implementation of recently approved investment projects. Additionally, the formation of a strong and stable government at the Centre is expected to augur well for India's economy due to speedier implementation of progressive policies.

Until now, stagnant domestic growth hurt consumer sentiments which were reflected in subdued demand and consumption. Further, the inflationary impact on raw material prices, largely due to the depreciation in Rupee, led to frequent price increases. Domestic demand for your Company's product was comparatively although not as good as expected. Demand from the export region was relatively better and encouraging than the domestic region which remained stagnant.

At the international business level, despite a persistently challenging global environment, some markets where your Company operates showed sign of recovery. A tight Control on expenses and lower raw material inflation helped the international operations of the Company to deliver a strong performance despite difficult market conditions.

India has become the second best in terms of growth amongst the top ten steel producing countries in the world and a net exporter of steel during 2013–14. Steel production in India recorded a growth rate of 4.8 per cent in February, 2014 over February, 2013. The cumulative growth during April–February, 2013–14 stood at 4.2 per cent over the corresponding period of the previous year.

Steel contributes to nearly two per cent of the gross domestic product (GDP) and employs over 500,000 people. The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is expected to touch US\$ 95.3 billion by 2016. The infrastructure sector is India's largest steel consumer, thereby attracting investments from several global players. Owing to this connection with core infrastructure segments of the economy, the steel industry is of high priority right now. Also, steel demand is derived from other sectors like automobiles, consumer durables and infrastructure; therefore, its fortune is dependent on the growth of these user industries.

Steel castings Industry is considered to be the backbone of engineering industry serving Automotive, Agricultural, Mining and Earthmoving Equipment Industry and almost all downstream engineering industry. The FY 2013-14 was challenging with lower growth in industrial production mainly due to continuing high rate of inflation and depreciation of the rupee. These factors had an adverse impact on the economy resulting in lower GDP growth rate. Rising input costs, slow pace of industrial production, infrastructure development and the impact of global slowdown constrained the performance of the industry. All most all sectors registered lower growth rate during FY 2013-14. Hence, it affects Steel industry as well.

The Indian steel industry is largely iron-based through the blast furnace (BF) or the direct reduced iron (DRI) route. Indian steel industry is highly consolidated. About 60% of the crude steel capacity is resident with

Integrated Steel Producers (ISP). But the changing ratio of hot metal to crude steel production indicates the increasing presence of secondary steel producers (non integrated steel producers) manufacturing steel through scrap route, enhancing their dependence on imported raw material.

With urban population increasing globally, there is a greater need for steel to build public-transport infrastructure. Emerging economies will also continue to be a major driver of demand as these necessitate a huge amount of steel for urbanisation and industrialisation. The sector is expected to see an investment to the tune of about Rs. 2 trillion (US\$ 33.06 billion) in the coming years.

India's rank in the world order of steel production remained unchanged at fourth slot with an output of 81.2 million tonnes, despite logging the highest growth of 5.05% among major producing nations in 2013.

There was no change in the top three steel producing nations with China, Japan and the US retaining their slots in the respective order in 2013, World Steel Association (WSA) data revealed.

Government Initiative

The liberalisation of the industrial policy and other government initiatives have given a definite impetus for entry, participation and growth of the private sector in the steel industry. The Government of India has allowed 100 per cent FDI through the automatic route in the Indian steel sector. It has significantly reduced the duty payable on finished steel products and has streamlined the associated approval process.

In order to provide thrust on research and development (R&D), the Ministry of Steel is encouraging R&D activities both in public and private steel sectors, by providing financial assistance from Steel Development Fund (SDF) and Plan Scheme of the Central Government. Under the SDF scheme, 82 R&D projects have been approved with total project cost of Rs 677 crore (US\$ 111.92 million) wherein SDF assistance is Rs 370 crore (US\$ 61.17 million). Under the Plan Scheme, eight projects were approved with a total cost of Rs 123.27 crore (US\$ 20.38 million) wherein Government assistance is Rs. 87.28 crore (US\$ 14.43 million).

To encourage beneficiation and pelletisation of iron ore fines in the country, basic customs duty on the plants and equipment required for initial setting up or substantial expansion of iron ore pellets plants and iron ore beneficiation plants has been reduced from 7.5 per cent to 2.5 per cent. Import of critical raw materials for steel industry, such as coking coal, non-coking coal and scrap are subject to zero or very low levels of custom duty.

Outlook

The outlook for the Company's Business in future is very good. The Management expects CAGR of over 30% during next five years.

The Government of India has allowed 100 per cent FDI through the automatic route in the Indian steel sector. It has significantly reduced the duty payable on finished steel products and has streamlined the associated approval process. The demand for steel is increasing and the prices have also firmed up during the year under report. The increase in steel making capacity by the Company will be absorbed by the increasing demand for steel products.

India's growth story was, till recently, quite attractive in comparison with many other developed and developing economies. Reforms in global economy indicate positive signal for overseas market.

Opportunities and Threats

The Indian steel industry has entered into a new development stage from 2007-08, riding high on the resurgent economy and rising demand for steel. India, a developing nation, requires huge contribution from this industry, to expedite its run to reach new heights in world economy. India has large reserves of mineral resources, such as, coal, iron ore etc. and is in a strong position to mobilise these resources into productive use. Vast market potential with increasing Industries provides assured market to the industry. Recovery in Indian economy during 2009-10 has given rise to new investment opportunities which will increase demand for steel products. The demand for steel is increasing and the prices have also firmed up during the year under report. The increase in steel making capacity by the Company will be absorbed by the increasing demand for steel products.

Any change in the foreign exchange control regulation, mainly interest rates and tax laws pertaining to India affects the liquidity of cash in the market which in turn affects the purchasing power of the economy.

The global economy is reviving from slowdown and would offer better business opportunities in near future. Further, stable government placed in India would indicate positive growth signal for an Indian Industry though in near term some short term challenges.

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of its strategy and its growth and expansion plans could impact the Company's roll out schedules and cause cost and time over runs.

Risk is inherent in every business activity and Steel Industry is no exception. The Company is exposed to risks from overall market fluctuations, changes in government policy, laws of the land, taxation, man made disaster, political risks and increase in cost of inputs like Iron ore, coal, power, diesel, freight, etc. which affect the financial performance of the Company.

We have audited the accompanying financial statements of Prakash Steelage Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2014, the Statement of Profit and Loss and Cash Flow Statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Provisions (excluding retirement benefits) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

Basic EPS is computed using the weighted average number of equity shares outstanding during the period. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year-end, except where the results would be anti dilutive.

Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
